

Senior Expert Product Stewardship - Hazard & Risk Management (m/f/d)

Location: Darmstadt, Germany (DE)

Job Function: Environment, Safety, Health & Quality

Career Level: Professionals

Company: Röhm GmbH

WHO WE ARE

We are a leading supplier of methacrylate chemistry. As a global company with around 2,900 employees, we are represented on four continents. We serve a global market with our MERACRYL® methacrylates and PMMA molding compounds under the PLEXIGLAS® brand (in the Americas registered under the trademark ACRYLITE®), which we manufacture in our worldwide production network. Our products supply growth markets including the automotive, construction, and medical technology industries.

This is what Röhm stands for: We assume social responsibility, and sustainability is an integral part of our business strategy. Diversity and inclusion are part of us as a matter of course.

WHAT YOU WILL DO

- Assessment of toxicological, ecotoxicological and physicochemical data, including non-animal approaches like QSAR and read-across; data gap analyses and development of testing strategies; commissioning and monitoring of experimental studies when needed.
- Implementation of hazard assessment according to new environmental CLP hazard classes as well as follow-up with and, where required, implementation of testing strategy according to data requirements under EU REACH for respective endpoints.
- Determine the hazard of chemicals and products and develop risk assessment strategies for the safety of workers, consumers, customers and the environment.
- Preparation of registration dossiers according to international legislation like e.g. REACH.
- Classification and labelling of substances and mixtures according to regulatory requirements (e.g. EU CLP / UN GHS).
- Communication of hazard and risk information with stakeholders internally and externally (e.g. coordination of relevant topics for business units with Product Stewardship).
- Representation of the company towards authorities and national and international committees, consortia and associations.

WHAT WE ARE SEEKING

- PhD in (eco)toxicology and/or postgraduate education in toxicology/ecotoxicology (e.g., Fachtoxikologe/Fachtoxikologin DGPT, ERT, DABT, SETAC GLB or comparable).
- Profound knowledge of eco-/toxicological studies, assessment of the results and application in regulatory processes and for risk assessments; knowledge in polymer chemistry / toxicology is a plus.
- Proficient in the identification of toxicological, ecotoxicological and physicochemical information and literature searches.
- More than 5 years of profound professional experience in the area of interest including experience in industry.
- Self-motivated, reliable team player with a proactive mindset and very good communication skills.
- Fluent in both German and English and used to work in an international setting.
- Very good knowledge of MS office applications and IUCLID; additional knowledge of SAP EHS or software for exposure assessment is a plus.

WHAT WE OFFER

We listen: Your ideas along our corporate values of creativity, openness, responsibility and entrepreneurial spirit are important to us.

- **Remuneration:** Attractive salary in the chemical tariff, special payments, participation in the company's success
- **Coverage:** Company subsidized pension scheme and long-term account, group accident insurance, support for caring for relatives, sickness benefit subsidy
- **Work-life-balance:** Flexible working, possibility of mobile working, 30 days of vacation per year, free parking
- **Health and social affairs:** Prevention programs, social and employee counseling, company sports & discounts in various fitness studios, meal allowance

...and much more. You can find an overview of our benefits on our careers page.
